Introduction

Capital Improvements Program (CIP) Introduction

The City of Atlanta's Capital Improvements Program (CIP), updated annually, is an implementation plan for the construction, maintenance, and renovation of public facilities and infrastructure. The CIP shows the allocation of projected expenditures for capital projects expected over the next five years.

The CIP includes those items typically considered as “*infrastructure*”—streets, sewer lines, bridges, etc., as well as facilities through which City government provides services directly to citizens or in support of City operations. The latter category includes such facilities as police precincts, recreation amenities, maintenance facilities, and general office buildings. The CIP covers all facilities that City government owns and has responsibility for. It includes facilities of both general government operations and enterprise operations. The Water and Sewer System and Hartsfield-Jackson Atlanta International Airport are enterprise operations. The enterprise operations are self-supporting and generate their own capital funds through revenue bonding or operating revenues, while general government capital improvements rely on annual bond issues and voter approved general obligation bonds, as well as general and internal service funds, and dedicated tax millage and grants.

The CIP is based on the City's Comprehensive Development Plan (CDP). The CDP is intended to provide policy direction for the capital funds budgeted in the annual budget and implementation of the Georgia Development Impact Fee Act, the annual General Obligation Bond issue and other capital fund sources. The CDP programs and projects are separate from the CIP and are identified as the Short Term Work Program (STWP).

The CIP document is submitted with the STWP to the Atlanta Regional Commission (ARC) and to the Georgia Department of Community Affairs (DCA), as required by the Georgia Planning Act, in order for the City of Atlanta to maintain its Qualified Local Government (QLG) status. The CIP/STWP has to be adopted every year by October 31st. QLG status makes the City of Atlanta eligible for various state and regional funding and to collect impact fees.

Capital Improvements - Definitions

The CIP identifies major improvements and capital purchases needed to improve services to the community. Projects covered in this Program involve City infrastructure and facilities, which have the following characteristics:

- any project, facility or equipment with a monetary value of at least *\$25,000 and will last longer than 5 years.*
- any project, facility or equipment, which meets the above criterion and will benefit from extended life through renovation, replacement, refurbishment or expansion.
- any project, facility or equipment that is currently funded in an existing capital improvement or bond program that will not be completed by June 30, 2013.
- any project that results in purchase, improvement or development of land.

Introduction

Normal equipment items, such as rolling stock, are not part of the CIP process and are treated as operating budget items.

As noted, the City CIP covers City government capital projects only. These projects are carried out to provide the facilities for the provision of City services, to supply the basic infrastructure of streets, bridges, sewers, sidewalks, etc. and to support, encourage and shape the direction of private development. Many other factors influence infrastructure development in the City, such as the Metropolitan Atlanta Rapid Transit Authority (MARTA), the Atlanta Housing Authority, the BeltLine, the State and Federal Governments, Community Improvement Districts and the Atlanta Board of Education. Also, private developments directly interact with the future and direction of City growth, requiring City involvement and support and providing the opportunity to leverage focused private investment with City resources.

CIP/STWP Plan Development and Approval

The CIP Subcabinet, a committee comprised of representatives from each City Department, was responsible for developing project listings based on identified and projected needs. Each department is responsible for completing the information for each project listed in the CIP and for ensuring projects included in the document could be linked to identified funding sources.

The draft 2013-2017 Capital Improvements Program was developed by the CIP Subcabinet. After an initial public hearing on June 11th 2012, the CIP/STWP will be sent to ARC and DCA for a 60 day review. A second public hearing will be held on September 10th, 2012. Afterwards, CIP/STWP will be before City Council for adoption.

The management and implementation of projects in each specific chapter are the Department's responsibility. The Office of Planning in the Department of Planning and Community Development is responsible for preparing the CIP document and for reviewing the CIP for conformity with adopted development policy and plans for the City. The Department of Finance is responsible for making recommendations as to funding sources and schedules.

Funding Sources for the Capital Improvements Program

The CIP identifies revenues that are forecasted to be available for capital purposes. The appropriation of these funds is accomplished through the City's normal budget process. Operating funds, including the Park and Improvement fund and the renewal and extension funds are subject to the regular City budget cycle and are appropriated as part of the annual budget. Other funds, such as grants and bond proceeds, are appropriated whenever they are received or awarded during the course of the fiscal year. Items programmed in the CIP to be funded from expected revenues are still subject to appropriation in the normal budget process.

The voters through bond referendum are responsible for approving any additional General Obligation Bonds beyond the statutory limits. On July 19, 1994, voters approved \$149,970,000 to finance the cost of various capital projects for the City, consisting of \$78,225,000 for streets, bridges, viaducts and related public improvements; \$55,605,000 for improvement of storm water

Introduction

drainage facilities and related public improvements; and \$16,140,000 for erosion and flood control and related public improvements.

On November 7, 2000, voters approved \$150,000,000 to finance the cost of various capital projects for the City in the 2000 Quality of Life Improvement Bonds. This bond funded projects in four broad categories: Sidewalk Program; Public Plazas and Greenspaces; Public Streets, Bridges & Viaducts; and Public Traffic Control Devices.

The Capital Improvements Program Document

The CIP includes a total of 187 projects with a preliminary estimated cost of approximately \$3.4 billion dollars. The table below summarizes the funded capital projects included in the 2013-2017 CIP/SWTP.

Introduction

The Capital Improvements Program document has been designed to be informative and user friendly for all of the stakeholders interested in the City's capital projects. The data for each project included in the CIP is pulled from a relational database that the members of the CIP Sub-Cabinet committee (departments and agencies involved in the CIP process) have access to for data entry.

The CIP is divided into departmental chapters. The chapter for each department includes the Department mission statement, followed by a table that summarizes all of the capital projects for that department. This summary includes the project's capital improvement identification, project name, estimated cost, Council District and current project status. Following the summary, each capital project is listed individually. The project name and number, estimated cost, funding source, description, project type, project phase, start and end date, Council District(s) and Neighborhood Planning Unit(s) (NPU), and a general location map is included.

The project phase identified in each capital project is the current phase of the project. This is also identified in the summary table for each department as the project status. The following phases can be attributed to an individual project:

- **Planning:** The process of the design phase based on the needs and requirements collected in the conceptual phase. This includes scheduling, developing solutions to needs and requirements, setting up the functional specifications and cost estimates.
- **Concept:** Pre-design phase that explores design ideas which are plausible and sets up situational constraints in order to generate new options.
- **Design:** An implementation on the foundational analysis, solutions and specifications developed in the initial stages.
- **Environmental Clearance:** The National Environmental Policy Act (NEPA) of 1969 established protocol by which agencies are required to evaluate projects impacts on the social and natural environment. There are three levels of Environmental Clearance: Categorical Exclusion, Environmental Assessment (EA), and Environmental Impact Statement (EIS).
- **Property Acquisition:** The process of acquiring properties or land necessary to build a project.
- **Utility Coordination:** Effectively identify utilities and resolve conflicts on proposed plans.
- **Final Design:** The detailed architectural and engineering drawings of all physical components of the project are produced.
- **Bid and Award:** The process of submitting a proposal with a cost estimate and a contractual agreement on the bid offer and proposal of both parties.
- **Construction:** The development of the project is in process.
- **Close Out:** The process when the project's construction is finished and is in a period of acceptance or rejection of the construction.
- **Completed:** The project has been executed and will be included in Appendix B: List of Completed Projects if the project was completed between January 1, 2011 – June 30, 2012.
- **Cancelled/Dropped:** A project can be cancelled or dropped due to an event that has occurred before the end of the project's expected life. These projects will not be included in the Capital Improvement Element project list.

Introduction

The Connection between the Capital Improvements Program & The Comprehensive Development Plan

The Community Agenda portion of the Comprehensive Development Plan (formerly known as *The Atlanta Strategic Action Plan*) includes policies, programs and projects needed to implement the Comprehensive Plan over the next 15 years. That list of programs and projects is updated annually in the document known as the Short Term Work Program or the CDP Project List. The STWP is the second portion of this document. As funding for a capital project is identified, then that capital project is also listed in the Capital Improvement Program.

Impact Fee Capital Improvement Element (CIE)

The City of Atlanta Development Impact Fee Ordinance was adopted by the Atlanta City Council on March 18, 1993 in accordance with the Authority provided by Article 9, Section 2, paragraph 4 of the Constitution of the State of Georgia and the Georgia Development Impact Fee Act (DIFA) (Title 36, Chapter 71, Official Code of Georgia Annotated). The ordinance is currently being updated.

In order to collect impact fees, the City of Atlanta has to complete a Capital Improvement Element (CIE) every year. The CIE has two components: an Annual Financial Report and a Schedule of Improvements. The Annual Financial Report provides an overview of impact fees collected, encumbered and used by category of public facility and service area for the last completed fiscal year. The Schedule of Improvements identifies capital projects to be financed in whole or in part by impact fees during the upcoming five years. The Impact Fee Capital Improvement Element is in Appendix A.

List of Completed Projects

A list of capital projects completed over the last two years is in Appendix B. The list is organized by the Department. For each completed project, the project name, description, completion date, estimated cost, Council District and NPU is included.

Introduction

Public Art Program

Since its start in 1977, the City of Atlanta Public Art program has supported the creation of public art through the Percent-for-Art Ordinance. The ordinance requires that a percentage of major capital improvement projects' construction be set aside for public art. The ordinance identifies the funds (grant funds, general obligation bonds, revenue bonds, general funds) and the types of projects (new construction or remodeling, parking facilities, street and streetscape improvements) that participate in the 1.5% percent allocation for public art.

The Public Art Program is administered by the Office of Cultural Affairs Public Art Program Manager in the Department of Parks, Recreation and Cultural Affairs. The Public Art Master Plan is the guide for the development, administration and conservation of public art. The Public Art Advisory Committee advises on the implementation of the master plan.

The percent for the art should be identified as soon as the Capital Improvement Program budget is established. This ensures that planning for the public art is included in the project's development.

Revitalization of Harris Homes

Project Number:

AHA--3661

Project Type:	Housing	Phase:	Design
Project Start Date:	October 2009	Estimated	
Project End Date:	December 2017	Project Cost:	\$25,710,000.00
District(s):	4	Funded:	\$21,210,000.00
NPU(s):	T	Shortfall:	\$4,500,000.00

Description: AHA procured Harris Redevelopment LLC, which is a joint partnership of between Integral Properties and Real Estate Strategies, to develop CollegeTown at West End on the site of the former Harris Homes as a dynamic mixed-use, mixed-income multi-generational community. The revitalization vision to create a quintessential college town environment is based on a strategic partnership with Morehouse College, Spelman College, and Morehouse School of Medicine that integrates the newly developed community with the Atlanta University Center schools. Upon completion, the revitalized community will replace 760 functionally obsolete and severely distressed multifamily units with 290 elderly-only rental units, 26 special needs rental units, 373 multifamily rental units, 333 on-site for-sale homes and 50 off-site affordable for-sale homes in the surrounding community. To date, 689 rental units and 27 off-site affordable for-sale homes have been completed. The remaining on-site homeownership units, neighborhood-serving retail and a 100-room hotel will be developed as market conditions warrant. The revitalization of Harris Homes was made possible by \$39M in HOPE VI demolition and revitalization grant funds from the U.S. Department of Housing and Urban Development. These funds were leveraged by AHA and its private sector development partner to secure \$54M in private debt, tax credit equity and other development funds. AHA provided an additional \$11M for site remediation and strategic acquisitions. Public Improvement costs to date are \$21.2M and work is complete on these phases which includes construction of public streets, streetscaping, storm/sewer separation (consistent with the consent decree), water distribution and erosion control improvements in the public right-of-way. The City of Atlanta funded \$17.7M consisting of \$7.5M in Housing Opportunity Bonds, \$.7M in Quality of Life Bonds, and \$9.5M in Water and Sewer Bonds. All funds are expended. AHA provided \$3.5M to support the installation of public improvements. Future public improvement project costs include the \$4.5M proposed widening of Lowery Street which is planned in the next 48 months. This activity will support the overall revitalization plan by alleviating traffic congestion along Lowery Boulevard between I-20 and Fair Street. \$3.5M is requested from the City of Atlanta from the City of Atlanta's existing State-funded transportation allocation. AHA will provide \$1.0M in match funds. The CIP funding shortfall for Harris Homes is \$4.5M. The Harris Homes HOPE VI revitalization program has served as a catalyst for community and economic development, generating approximately \$102 million in area investments, including APS investments in a new high performing elementary school, a state of the art Performing Arts Center, and a YMCA early childhood development center. When completed, the estimated total area economic impact of this revitalization initiative will be over \$278 million.

Revitalization of McDaniel Glenn

Project Number:

AHA--3662

Project Type:	Housing	Phase:	Construction
Project Start Date:	June 2006	Estimated	
Project End Date:	December 2017	Project Cost:	\$22,300,000.00
District(s):	4	Funded:	\$15,600,000.00
NPU(s):	V	Shortfall:	\$6,700,000.00

Description: AHA procured McDaniel Glenn Revitalization LLC, which is a joint venture partnership between Columbia Residential, RHA and SUMMECH Community Development Corporation, to develop Mechanicsville on the site of the former McDaniel Glenn as a dynamic mixed-use, mixed-income multi-generational community. Promoting a healthy and sustainable community, the master plan includes the revitalization of recreational green space at Rosa Burney Park, and the redevelopment of the Dunbar Recreational Center in partnership with the City of Atlanta and the Annie E. Casey Foundation. Upon completion, the revitalized community will replace 588 functionally obsolete and severely distressed public housing units with mixed-income housing consisting of 155 elderly-only rental units, 658 multifamily rental units, 174 on site for-sale homes and 110 off-site for-sale homes in the surrounding community. To date, 813 rental units and 18 off-site for-sale homes have been completed, some in partnership with the City through its Neighborhood Stabilization Program. The remaining for-sale homes will be developed as market conditions warrant. The revitalization of McDaniel Glenn was made possible by \$20M in HOPE VI revitalization grant funds from the U.S. Department of Housing and Urban Development. These funds were leveraged by AHA and its private sector development partner to secure \$67M in private debt, tax credit equity and other development funds. The overall Public Improvements budget is \$22.3M with \$14.5M expended to date on the construction of public streets, streetscaping, storm/sewer separation (consistent with the consent decree), water distribution and erosion control improvements in the public right-of-way. The City of Atlanta funded \$11.2M from Water and Sewer Bonds, of which \$10.1M has been expended. AHA provided \$4.4M to support the installation of public improvements. Future public improvement project costs include \$7.8M for the public improvements work associated with the development of the balance of the McDaniel Glenn footprint and the three scattered site annex parcels located within the Mechanicsville neighborhood. This work is planned in the next 48 months and will support the development of 174 for-sale homes. \$1.1M of the \$11.2M in Water and Sewer Bond funds already allocated by the City will be utilized. \$6.7M is requested from the City of Atlanta, which represents the CIP funding shortfall for this McDaniel Glenn. The McDaniel Glenn HOPE VI revitalization program has served as a catalyst for community and economic development, generating approximately \$64M in area investment including the revitalization of Rosa Burney Park, Dunbar Recreational Center and Dunbar Early Learning Resource Center. When completed, the estimated total area economic impact of this initiative will be over \$209M.

Revitalization of Grady Homes

Project Number:

AHA--3663

Project Type:		Phase:	Design
Project Start Date:	September 2007	Estimated	
Project End Date:	December 2017	Project Cost:	\$11,800,000.00
District(s):	5	Funded:	\$10,800,000.00
NPU(s):	M	Shortfall:	\$1,000,000.00

Description: AHA procured Grady Redevelopment LLC, which is a joint venture partnership between Integral Properties and Urban Realty, to develop Auburn Pointe on the site of the former Grady Homes as a dynamic mixed-use, mixed-income multi-generational community. Promoting a healthy and sustainable community, the master plan includes greenspace, community gardens and the revitalization of Butler Park which is adjacent to the Auburn Pointe, developed in partnership with the City of Atlanta. Upon completion, the revitalized community will replace 495 functionally obsolete and severely distressed public housing units with mixed-income housing consisting of 324 elderly-only rental units, 304 multifamily rental units, 48 on site for-sale homes and 21 off-site affordable for-sale homes in the surrounding community in partnership with Habitat for Humanity. To date, 478 rental units and 21 off-site affordable homes have been completed. Construction on 150 multi-family rental units will begin in September 2012. The remaining on-site for homes will be developed as market conditions warrant. The revitalization of Grady Homes was made possible by \$24M in HOPE VI demolition and revitalization grant funds from the U.S. Department of Housing and Urban Development. These funds were leveraged by AHA and its private sector development partner to secure \$43.6M in private debt, tax credit equity and other development funds. AHA provided an additional \$32.9M in funding for site remediation and strategic acquisitions. The overall Public Improvements budget is \$11.8M with \$10.8M expended to date on the construction / paving of public streets, streetscaping, storm/sewer separation (consistent with the consent decree), water distribution and erosion control improvements in the public right-of-way. The City of Atlanta funded \$5.8M in Water and Sewer Bonds and \$330K in Quality of Life Bonds. A total of \$5.4M has been expended in City funds. AHA provided \$5.4M to support the installation of public improvements. Future public improvement project costs include \$1.0M for the public improvements work associated with the development of 48 on-site for-sale homes. This work is planned in the next 60 months. The CIP funding shortfall for Grady Homes is \$1.0M. The Grady Homes HOPE VI revitalization program has served as a catalyst for community and economic development generating approximately \$104 million in area investments, including the adjacent Pencil Factory Lofts, the proposed Russell development on Wm. Homes Borders Sr. Drive, area condominium developments along DeKalb Avenue and the revitalization of Butler Park. When completed, the estimated total area economic impact of this revitalization initiative will be over \$210 million.

Revitalization of University Homes

Project Number:

AHA--3664

Project Type:	Housing	Phase:	Planning
Project Start Date:	January 2008	Estimated	
Project End Date:	December 2015	Project Cost:	\$6,000,000.00
District(s):	4	Funded:	\$1,000,000.00
NPU(s):	T	Shortfall:	\$5,000,000.00

Description: Integral Development LLC is carrying out the revitalization of University Homes to create a dynamic mixed-use, mixed-income multi-generational community known as Scholars Landing, working collaboratively with the Atlanta University Center schools (Clark Atlanta University, Spelman College, Morehouse College and Morehouse School of Medicine). This revitalization is part of a larger collaborative master planning effort to create a college town environment that will transform three neighborhoods that surround the Atlanta University Center schools and the former University Homes? site. This planning effort is funded by \$250K from a 2010 U.S. Department of Housing and Urban Development's Choice Neighborhoods Planning Grant and a \$177K match from AHA. The first phase (Veranda at Scholars Landing) to develop 100 affordable senior rental units is under construction, with \$13.4M in construction costs funded solely from private debt and tax credit equity. AHA funded \$2.0M for public improvements and site remediation. A second phase to develop 60 affordable assisted living rental units is in the planning stage, with development pending an award of low income housing tax credits in September 2012. While still in the planning phase, the projected Public Improvements budget for currently planned phases is \$6.0M for the construction of public streets, streetscaping, water distribution and erosion control improvements in the public right-of-way related to the development of the first phase (senior housing). AHA provided \$1.0M to fund the initial phase of public improvements which is currently under construction. Future public improvement project costs are budgeted for \$5.0M. This work is planned in the next 48 months. The CIP shortfall for University Homes is \$5.0M.

District(s):	9	Funded:	\$46,068,391.00
NPU(s):	G,J	Shortfall:	\$0.00

Description: Bellwood Quarry Reservoir is a former surface mining quarry that the City of Atlanta is converting to a 2.4 billion gallon raw water storage reservoir for the drinking water system. The reservoir's water surface will cover approximately 40 acres. Preliminary studies and projected site development have identified that the City cannot adequately construct a secure perimeter service road around the quarry rim without obtaining easements from the adjacent property owner which in this case is the Georgia Power Company. The required easement dimensions are currently being developed.

NPU(s):	D	Shortfall:	\$0.00

Description: Clearwell #1 at the Hemphill Water Treatment Plant is a 10 MG underground storage facility that serves two purposes: 1) it is one of three secured storage areas at the plant for finished water and 2) it is baffled to allow the plant to obtain adequate disinfectant contact time for the finished water before the water is pumped into the distribution system by the Hemphill Pump Station. Clearwell #1 is currently out of service. Before returning to service, leaks in the existing PVC liner must be located and repaired. In addition, underground voids in the soil around the clearwell must be delineated and repaired before the tank can be stressed by filling it again.

District(s):	All	Funded:	\$66,884,239.00
NPU(s):	All	Shortfall:	\$0.00

Description: A February, 2008 raw water pipeline assessment report indicated that while all four existing mains need improvement, it would be feasible to renew these pipelines vs replacing them. Three of the mains are cast iron, diameters of 48-inch, 36-inch, and 30-inch, well beyond their predicted design life, still exhibiting structural integrity, but connected with lead joints subject to failure and difficult to repair. The fourth main is a 72-inch diameter steel main, installed in the early 1970's but consists of a brittle steel material known for failures during cold water temperatures. All the valves in the mains require replacement. Renewal of these mains are proposed in two phases. The first phase identifies a renewal method for the 3 cast iron pipes in the railroad yard adjacent to Hemphill Reservoir #2. One of these mains has already failed under the main-line railroad tracks and has been shut-down and isolated from service. Phase 1 will utilize a renewal method internal to the existing mains and renew at least a 400-foot section of each of the 3 existing pipes where they cross under the railroad main-line tracks. Within the railroad yard, voids around the existing mains will be identified and repaired. In Phase 2, the remaining mains will be renewed, all valves will be replaced so that any future leaks can be easily isolated, and some modifications at the existing raw water pump station will be implemented.

District(s):	6	Funded:	\$9,627,894.00
NPU(s):	F	Shortfall:	\$0.00

Description: The project consists of a proposed 15-mgd deep submersible pump station and 4.5 MG storage cavern to capture and store wet weather flows from DeKalb County. The proposed site is located at the City of Atlanta and DeKalb County boundary on the South Fork Peachtree Creek Relief sewer, near the intersection of Peachtree Creek and Briarcliff Road. Wet weather flows, primarily from DeKalb County, will be diverted to the storage facility anticipated to be approximately 200 feet below grade and 700 feet in length. The pump station shaft is approximately 40 - 50 feet in diameter. The storage and pumping system will significantly reduce the capacity demand on the existing Peachtree Trunk and Peachtree Trunk Relief, both of which experience significant surcharge and incidence of spills during wet weather events.

Note that the cost estimate shown below represents only 25% of the total estimated cost, since the City of Atlanta anticipates at least 75% contribution from DeKalb County.

Description: The City of Atlanta has at least 32 miles of steel water mains within the treatment plants and the drinking water distribution system. The cathodic protection system for virtually all of this installed pipe has gone un-monitored for at least a decade. An effort to document all the steel pipe installations, perform field tests to determine the status of the protection systems, and design an adequate system to restore the cathodic protection is critical to protect these valuable assets. While steel pipe is of greatest concern, other metal structures subject to corrosion that is inadequately protected shall be identified.

Cathodic Protection is an industry proven method of minimizing corrosive deterioration of steel water mains. This project will provide the restoration services required to renew critical drinking water pipeline cathodic protection systems on drinking water steel pipe. Many of these cathodic protection systems have been consumed, damaged, or never existed.

North Area Main Improvements

Project Number:

98.04.019

Project Type:	Infrastructure	Phase:	Construction
Project Start Date:	December 2005	Estimated	
Project End Date:	May 2014	Project Cost:	\$27,875,000.00
District(s):	2,3,6,7,10	Funded:	\$27,875,000.00
NPU(s):	A,C,D,E,F,J,K,L,N,Z	Shortfall:	\$0.00

Description: In order to maintain adequate hydraulic pressures and flow rates in the northern portion of the distribution system, a hydraulic modeling study performed in August, 1995 originally projected several new transmission mains would be required in the area by the year 2000. While water conservation measures and slower than anticipated growth have somewhat allowed the extension for the implementation of this project, there have been periods where water pressures were low and peak demands have drained storage tanks. These events resulted in the December 1997, and March 2003 Georgia EPD Consent Orders. The initial 1995 recommended routes have been revised and augmented for several reasons: additional modeling was performed to specifically respond to the Consent Order issues; and excessive failures began occurring on Northside Drive, a major northern feeder route, and an opportunity arose to coordinate with GDOT on a major street improvement on Northside Drive. This led to beginning an engineering design for the new route. This transmission main will replace existing distribution piping that is both undersized and beyond its useful life. The proposed main consists of pipe diameters including 36-inch and 12-inch. This transmission main segment will be implemented in 2 sections with the total length running from Marietta St. on Northside Drive, north to the Northside pump station.

District(s):	9	Funded:	\$62,193,000.00
NPU(s):	C,D	Shortfall:	\$0.00

Description: This project will assess the current solids loading at the RM Clayton treatment plant and will determine necessary equipment upgrades to maintain adequate solids processing capacity. The solids loading at the facility has increased with commissioning of the West CSO Treatment plant and with the return of wet weather events. Several of the solids treatment equipment trains at the facility have not been upgraded since the 1970's plant expansion and these systems are operating at nearly maximum capacity. Adequate solids handling processes are necessary to maintain compliance with the NPDES permit, which is currently being renewed and will include more stringent discharge limits.

This project must be a total examination and upgrade of the plant's solids area systems. This must include: West Area CSO, Headworks, Primaries, Waste Activated Sludge (WAS) handling system, Digesters and Incineration.

Long-term landscaping improvements include further improvements to the site entrance, the installation of a trail, and additional landscaping and buffer improvements along the site perimeter.

NPU(s):	All	Shortfall:	\$0.00

Description: The objective of the Water Loss Program is to meet the Department of Watershed Management's (Department) strategic goal of water conservation through the reduction of water loss in the water distribution system. Under this Plan, the City will identify subsurface leakage associated with the City's large diameter water mains (= 20-inch dia).

The infrastructure to be surveyed for leak detection under this program includes large diameter distribution main pipes (= 20-inch dia) within the Department's water distribution system, associated taps, and in-line valves. The implementation of the program will assist the Department in surveying the large diameter distribution mains for leaks; prioritizing system leaks for repair, and integrating the resulting data in the Department's GIS and Maximo databases for records retention.

The City's Bureau of Drinking Water treats any surface leak on a 20-inch main and larger as an emergency and initiates repairs for those leaks immediately. The cost shown here is for the identification of leaks only. The repair of the leaks occurs at additional cost.

Description:	<p>With over 2,700 miles of installed water mains in the City of Atlanta water distribution system and considering they were installed with a 50 - 100 year design life, a minimum of 27 miles of pipe should be renewed each year in order to maintain a sustainable system. In 2004, a water main replacement program used hydraulic modeling and GIS to evaluate the City's installed distribution piping based on asset criteria such as age, material, breakage history, fire flow, and water quality, and recommended a neighborhood approach to renew the distribution system based on priority need. While this was an improvement over previous renewal selection methods, it did not address critical water main renewal needs outside the selected priority neighborhood that surface on an annual basis. A new management program, based on available prioritization software, will utilize all available historical data, new condition assessment data, GIS, water quality reports, and hydraulic modeling to rate system-wide priorities and make annual determinations on implementing specific priority improvements. Once the annual improvements are prioritized, an in-house design team will develop applicable construction documents.</p>

The Water System Delivery Plan has a proposed budget of \$35.4 million dollars and is proposed to be conducted in 3 phases over the next 6 years. Funding for the Design and Construction Phases of the project are included to ensure that the project can move immediately from planning to design and construction. The projects included for design and construction under this project will be high priority projects that are not currently included in the CIP. These projects will be defined during the Planning Phase of this project. As such, the budgets for design and construction are placeholders only.

District(s):	1,10	Funded:	\$56,123,532.00
NPU(s):	H,Z	Shortfall:	\$0.00
Description:	The EPA and EPD are looking seriously at new nutrient removal permit requirements that will require plant upgrades. South River is in need of equipment upgrades and replacement due to the age of the facility and to reliably meet new permit limits. Intrenchment Creek needs a complete updating of equipment if it is to continue operating. This has been deferred because of the possibility of plant consolidation and the expenses incurred under the Consent Decree projects. All flows from these two facilities currently are transported to an outfall that is by Utoy Creek. Flint River Pump station should be designed and built for transport and treatment as a designed facility.		

Serious consideration should be given to consolidate these facilities into the Utoy facility. The Utoy plant is the newest and best operating facility the City operates. Consolidation will avoid expensive updates needed at South River to meet compliance and avoid costs associated with updating the Intrenchment Creek facility. The Utoy facility should be expanded and evaluated for meeting upcoming nutrient removal permit requirements. This project will reduce operating costs by approximately 15 million per year and eliminate the need for reinvestment capital in two aging facilities.

Description:	Under the Consent Decree, the City of Atlanta has inspected every foot of sewer through the SSES program. All condition assessments have been loaded into the CMMS system for the purpose of establishing a true asset management program. This program is designed to keep the system in top operating condition throughout the life of the utility.		

Some of the assets inspected, were inspected up to ten years ago. A program must be developed to continue inspection and maintenance based on condition criticality that ensures rehabilitation and/or replacement of these assets as appropriate. This will assure that all system assets are addressed in a timely fashion. The average footage inspected and rehabilitated per year could reach 250,000 feet of pipe. It is estimated that half of this pipe will need rehabilitation at a cost of \$200 per foot. This is the basis for an asset management program that reinvests 25 million dollars a year to maintain assets in good operating condition throughout the life of the utility.

Sewer Rehabilitation Contract (Annual)

Project Number:

DWM--3601

Project Type:	Infrastructure	Phase:	Construction
Project Start Date:	March 2011	Estimated	
Project End Date:	May 2014	Project Cost:	\$16,000,000.00
District(s):	All	Funded:	\$16,000,000.00
NPU(s):	All	Shortfall:	\$0.00
Description:	This project will consist of rehabilitation work discovered from SSES efforts. The project will be set up as an undefined contract. Work orders will be issued based upon the SSES data, modeling output and rehabilitation design criteria for all sewers.		

Sewer Group [5R] - Peachtree Basin North Fork Storage and Pump Station

Project Number:

DWM--3603

Project Type:	Infrastructure	Phase:	Design
Project Start Date:	March 2010	Estimated	
Project End Date:	December 2014	Project Cost:	\$29,062,919.00
District(s):	6	Funded:	\$29,062,919.00
NPU(s):	F	Shortfall:	\$0.00

Description: The project consists of a 30-mgd deep submersible pump station to lift stored flow from a 4 MG underground linear storage facility. Wet weather flows, primarily from DeKalb County, will be diverted to the storage facility anticipated to be 200 feet below grade and roughly 1000 feet in length. The pump station is approximately 40 to 50 feet in diameter. The storage and pumping system will significantly reduce the capacity demand on the existing Peachtree Trunk and Peachtree Trunk Relief, both of which experience significant surcharge and incidence of spills during wet weather events. The approximate 3-acre site requirement is proposed in a 3.25-acre undeveloped site east of Lenox Road, on Buford Highway. The property is currently owned by Georgia DOT.

The storage system will receive diverted flows from the Peachtree Creek North Fork Relief sewer.

Note that the cost estimate shown below represents only 25% of the total estimated cost, since the City of Atlanta anticipates at least 75% contribution from DeKalb County.

Atlanta Streetcar Project

Project Number:

DWM--3650

Project Type:		Phase:	
Project Start Date:		Estimated	
Project End Date:		Project Cost:	\$0.00
District(s):		Funded:	\$0.00
NPU(s):		Shortfall:	\$0.00
Description:	<p>The Atlanta Streetcar Project is a 2.9 mile system that runs at-grade, in an East-West loop from the Martin Luther King Jr. national historic site to Centennial Olympic Park traveling on multiple streets with mixed traffic. Siemens Industry, Inc. was awarded a \$17.2 million contract from Metropolitan Atlanta Rapid Transit Authority (MARTA), on behalf of the City of Atlanta and the Atlanta Downtown Improvement District, to provide Atlanta with four new streetcars. The first car is expected to be delivered in September 2012 with revenue service beginning in early 2013. These will be the first streetcars in Atlanta since 1949.</p>		

According to the GA Transit Connector website, implementing this long-term regional transportation vision will provide core connectivity between existing heavy rail, planned light rail and the Belt Line with the "last mile" in the heart of Atlanta. Offering enhanced travel options and increased urban mobility, the COA streetcar will play an important role in economic development and job creation along its routes.

The budget includes federal, municipal and private funds from sponsors identified above including specific allocations for relocation of DWM public utilities. The total project budget is \$87 million. Of the total, \$45 million has been allocated for the design-build work to be performed under this contract

Fleet Replacement - Wastewater

Project Number:

DWM--3652

Project Type:	Phase:	
Project Start Date:	Estimated	
Project End Date:	Project Cost:	\$0.00
District(s):	Funded:	\$0.00
NPU(s):	Shortfall:	\$0.00
Description:	This project includes the replacement of the fleet within the Wastewater Bureau on a programmed basis which takes into account vehicle age and miles, or hours of service.	

There are presently 345 cars, trucks and pieces of heavy equipment in this Bureau. It is anticipated that cars will be replaced on a schedule of 80,000 miles or 7 years, whichever comes first; all trucks will be replaced on a schedule of 120,000 miles or 10 years, whichever comes first, and all heavy equipment will be replaced on a schedule dictated by condition, hours, duty cycles and manufacturer's recommendations.

Supplemental Program Management Services

Project Number:

Utoy Creek Incineration

Project Number:

DWM--3654

Project Type:	Phase:	
Project Start Date:	Estimated	
Project End Date:	Project Cost:	\$0.00
District(s):	Funded:	\$0.00
NPU(s):	Shortfall:	\$0.00
Description:	This project will upgrade an existing multiple hearth incinerator to achieve compliance with the 40 CFR 503 regulations and to modernize the unit for reliable operation. Enabling operation of this existing incinerator will permit for incineration of the South River and Internchment Creek biosolids which will eliminate all land-disposal for the City of Atlanta biosolids. Incineration will provide a significant cost savings as landfill cost have escalated over the last several years with the closing of nearby disposal sites. In addition, operational efficiency will increase as long-distance sludge hauls for disposal will be eliminated.	

Fleet Replacement - Drinking Water

Project Number:

The Land Support Services project is intended to support the smaller projects that are designed in-house and without the use of outside design services. The projects may arise from Operations, Sewer Rehabilitation Design, Emergencies or various similar internal sources. These projects typically involve sewer realignments, which may be subject to the First Amended Consent Decree (FACD) requirements and are time sensitive. In addition, the BES, in an effort to expedite access for sewer rehabilitation work and to populate the Department's database of permanent easement documents, requires additional easement research assistance from qualified easement/title researchers.

Jonesboro Pump Station (PS) peak flows are taken in to a 10 MG tunnel. This 45 MGD rated firm capacity station pumps the stored flow up to the South River WRC Headworks. The Jonesboro PS will remain in operation for dry weather flows and provide some backup to this station.

Short Term Work Program

Introduction

The Short Term Work Program (STWP), also known as the Comprehensive Development Plan's (CDP) Project List, is a key implementation tool of the Comprehensive Development Plan. It is a list of the major actions to be undertaken by the City of Atlanta to implement to meet the CDP's recommendations over the next 15 years.

In order to maintain Qualified Local Government (QLG) status under the Georgia Planning Act, the City of Atlanta must have an adopted Short Term Work Program (STWP) for implementation of the Comprehensive Plan. The City of Atlanta updates its STWP/CDP Project list annually and submits it to the Atlanta Regional Commission (ARC) and the Georgia Department of Community Affairs (DCA) for review and comment.

The STWP/CDP Project List includes a description of community and economic development initiatives, programs, major capital improvements, infrastructure expansions, regulatory measures, and land development regulations to be adopted or amended. The STWP/CDP Project List includes partially funded, as well as unfunded projects. A project must be in STWP/CDP Project List before it can be moved to the Capital Improvements Element project list.

For each item listed in the STWP/CDP Project List, the project name, a description of each project, the party responsible for implementation, estimated project cost, potential funding sources (Impact Fee, Potential Private/Foundation, Local, Regional, Federal, or TBA), Council Districts, and Neighborhood Planning Units (NPUs) are listed, as provided.

The STWP can be amended several ways: during the annual update process, by the adoption by City Council of a plan and the list of projects recommended by a plan, as a result of a Development of Regional Impact review or when a project is identified for impact fee funding. In addition, NPUs are asked to submit projects for their NPU annually during the STWP/CDP Project List update.

The sections in the Short Term Work Program and the corresponding Departments are:

- Economic Development
 - Department of Planning and Community Development (DPCD)
 - Atlanta Development Authority (also known as Invest Atlanta)
- Housing
 - Atlanta BeltLine, Inc.
 - Atlanta Housing Authority
 - Atlanta Development Authority (Invest Atlanta) – Urban Residential and Finance Authority (URFA)
 - Mayor's Office - Office of Human Services
 - DPCD – Office of Housing
 - Department of Watershed Management
- Natural and Cultural Resources
 - Department of Parks, Recreation and Cultural Affairs
 - DPCD – Office of Planning- Atlanta Urban Design Commission
 - Department of Watershed Management

Short Term Work Program

- Community Facilities
 - Atlanta BeltLine, Inc.
 - Corrections
 - Fire Rescue
 - Office of Enterprise Assets Management
 - Department of Parks, Recreation and Cultural Affairs
 - Police
 - Department of Public Works
 - Department of Watershed Management
- Transportation System

 - Department of Aviation
 - Department of Planning and Community Development (DPCD)
 - Police
 - Department of Public Works
- Land Use
 - Atlanta BeltLine, Inc.
 - Atlanta Development Authority (Invest Atlanta)
 - DPCD – Office of Planning
- NPU Projects – NPUs were asked to submit priority projects for inclusion in the STWP. The NPU projects are listed separately from the STWP. However, many of the projects have been included in the STWP by City Departments or are listed in approved plans and are therefore included in the STWP.

There are a total of 1,886 projects and programs listed in the STWP. The number of projects included in each department is listed in the table below.

1	2012 STWP Revitalization Projects	AHA is currently in the planning stage regarding the revitalization of the following properties located on the sites of former public housing developments: Englewood Manor, Palmer House, Bowen Homes, Bankhead Courts, Herndon Homes, U-Rescue, Hollywood Courts, Thomasville Heights, Jonesboro South, Leila Valley, and Jonesboro North. The total public improvements budget for the redevelopment of all the properties is budgeted at \$196M. Work is projected to begin on one or more of the properties by 2014 if the financial and real estate market conditions warrant. As properties are identified as candidates for development through procured private sector development partners, AHA will submit specific budget requests to the City of Atlanta to support the public improvement work. When completed, it is estimated that the development of these 2012 STWP properties, leveraged with the Beltline TAD projects, Hollowell LCI projects and other contiguous City and State sponsored initiatives, will generate more than \$3 billion in area economic development. 1	Care and Conserve Program	<p>The City of Atlanta Department of Watershed Management, through its Care and Conserve Program, has been assisting qualified low-income water and sewer customers since 1995. The program was established by Resoulution in September 1994 with three main foals in mind: 1) to provide bill payment assistance to low income (federal poverty guidelines) customers of the Atlanta water system, 2) to conduct home water use audits/counseling and conservation retrofits to maximize the efficiency of the water fixtures and help customers get their bills to a manageable level, 3) to perform plumbing repairs to upgrade efficiency and reduce leakage and waste.</p> <p>The Care and Conserve Program is asministerd by a Southeast Energy Assistance (SEA) a 501(c)(3) non-profit service provider.</p>	Local	\$3,000	All	All
2	Loring Heights CSO upgrades	The existing combined sewer overflow (CSO) on Loring Drive has recently been upgraded as greenspace. Other potential improvements there including passive amenities such as benches and landscaping.	Local	\$15	8	E
3	Sewer Asset Management	<p>Under the Consent Decree the City of Atlanta has inspected every foot of sewer through the SSES program. All condition assesments have been loaded into the CMMS system for the purpose of establishing a true asset management program. This program is designed to keep the system in top operating condition throughout the life of the utility.</p> <p>Some of the assets inspected, were inspected up to ten years ago. A program must be developed to continue inspection and maintenance based on condition criticality that ensures rehabilitation and/or replacement of these assets as appropriate. this will assure that all system assets are addressed in a timely fashion. The average footage inspected and rehabilitated per year could reach 250,000 feet of pipe. It is estimated that half of this pipe will need rehabilitation at a cost of \$200 per foot. This is the basis for an asset management program that reinvests 25 million dollars a year to maintain assets in good operating condition throughout the life of the utility.</p>	Local	\$224,391.04	All	All

185	Morningside Elementary School SRTS Project	The proposed projects will improve pedestrian safety in the following ways: installation of radar signals on E. Rock Springs Road will alert drivers to the speed being travelled and encourage slower speeds; moving the retaining wall closer to the school will allow for the installation of a wider (8', min) sidewalk in this congested walkway; the placement of a fence on top of the wall is an additional safety measure to discourage children from playing along the wall; flexible uprights serve a dual purpose of slowing traffic and discouraging mid-block crossing and drop-off; installation of a Hawk signal at E. Rock Springs and E. Sussex will address the high pedestrian traffic needs during school arrival and departure; the intersection improvements at N. Highland/Rock Springs Road and N. Morningside/N. Highland will decrease vehicle turning speeds by providing tighter radii and shorten pedestrian crossing distances; and the intersection reconfiguration with signal installation and slip lane removal at Morningside and Rock Springs Rd. will decrease the right turn speeds, improve pedestrian sight distance, decrease pedestrian crossing distance and provide control to vehicular traffic that has travelled free flow since Piedmont Rd. Short Term Work Program – NPU Projects

NPU Projects – Neighborhood Planning Units were asked to submit priority projects for inclusion in the STWP. The projects submitted by NPUs were forwarded to City Departments for review and comment. The NPU projects are listed separately from the Departmental STWP projects. However, many of the projects have been included in the STWP by City Departments or are listed in approved plans and are therefore included in the STWP.

A total of 358 projects are listed in the NPU Projects section of the STWP. The NPU Projects are grouped by the same categories as the STWP (see below). NPU Project Categories:

- Economic Development
- Housing
- Natural and Cultural Resources
- Community Facilities
- Transportation System
- Land Use
